Contract Furniture is redefining what to expect from Commercial Outdoor Furniture

Commitment

As a leader in the industry, we're committed to continually developing product innovations—such as our wood finishes and superior powder coating—to meet the needs and demands of our customers.

Reliability

Using an efficient manufacturing process, we manufacture products well known for being durable, long-lasting and maintenance-free. And we stand behind each and every one.

Responsiveness

We do whatever it takes to accommodate our customers. We provide your product on time—and in less time than our competitors—and immediately respond to all customer inquiries.

Value

With us, there are no surprises. You get the excellent product that you expect us to provide at a price that's a value.

Plastisol Coating

Our extensive selection of Plastisol-coated outdoor furniture and site amenities are designed to endure the harshest of weather conditions from season to season. These coated pieces consist of a 1/4" Plastisol coating, heat-fused and permanently bonded to the steel – this is 30 times the thickness of paints and powder coatings.

Low/No Maintenance

- Can be left outdoors all year – no need for winter storage
- Open design facilitates self-cleaning and discourages graffiti
- Will not leaf-stain or absorb water, grease or oil
- Open design resists being blown over, even in the strongest winds

Rugged Durability

- Five-year limited Plastisol warranty (the industry's finest)
- Rust-/corrosion-resistant
- Will not crack, peel, warp or rot
- Plastisol is unaffected by common acids, alkalis, salts, acid rain, sewage or sea water
- Stable, reinforced construction with stainless and/or galvanized steel
- Flame-resistant

Powder Coating

We've updated our powder-coating process and installed state-of-the-art equipment. Our products go through a six-step process to ensure the highest quality and longevity.

Our powder-coat system meets and exceeds AAMA 2605-04 (American Architectural Manufacturers Association) test specifications. Our coating stands up to some of the toughest test specifications, including adhesion, abrasion resistance, chemical resistance, corrosion resistance and fade resistance, to ensure that our product is one that will last.

AAMA Testing

Our coating underwent a corrosion-resistance test that includes a salt-spray test, which involves several steps. First, using a sharp knife, the film is cored sufficiently deep to reveal the base metal. Next, the product is exposed to 3,000 hours in a salt-spray cabinet.

The above information describes the coating on the furniture shown on pages 111-113.

Classic Series

Armchair
#CA300

Love Seats
#CA400 4' Love Seat
#CA401 4' Love Seat Add-On

Instruments to Shape Public Space®

When we look at landscapes, we envision shaping them with instruments. Instruments that are sleek...stylish...modern like beautiful outdoor furniture - meant to last a lifetime. Featuring high-end designs and extreme durability - all at an incredibly competitive price.

Wood You Know the Difference?

Nothing compares to the beauty of wood. But, let's face it — you need maintenance-free furniture that's as trouble-free and long-lasting as it is attractive.

Which is why we created the perfect solution with our faux-wood finishes hand-painted onto our powder-coated aluminum structure. They give you the beauty of wood without all the headaches, such as rotting, warping or breaking.

Architecturally Designed, Not Engineered

Somewhere deep down inside, we're all designers at heart. You want the ideal look...that perfect touch...subtle curves. Something that looks great and impresses the world.

Superb Coating Process

What's responsible for the good looks and durability of all our products? Our seven-step powder-coating process. While other companies also offer powder-coated products, our seven-step process ensures the highest quality and longevity for our products and exceeds AAMA 2604-05 specifications.

Seven Step Process

- Shot-Blasting to White Metal
- Five-Stage Chemical Pre-Treatment
- Pre-Heating
- Zinch-Rich Epoxy Coating
- Zinc-Rich Epoxy Coating Gel-Cure
- AAMA 2604-Compliant Polyester Topcoat
- Final Cure

Most items available in Faux Wood, Solid, Slat, Rod or Horizontal Slat materials. Not all items available in all material options. Please contact your regional sales representative for availability.
